

The Synonym Race - Essay on the Environment

The environment has become a pressing topic of concern over the past 2 decades. Human actions are the direct cause of global warming and if nothing is done soon, future generations will have to live through the devastating consequences. What can we do to solve this issue?

Firstly / First of all / to begin, a smarter use of transport is essential. Governments should actively encourage citizens to use public transport over private cars. **For instance / For example / To illustrate** they could open new bus routes and offer cheaper fares. **Furthermore / Besides / Moreover** companies could also promote carpooling. Employees could receive some kind of incentive for the litres of petrol saved through carpooling.

Secondly / Furthermore / In addition factory waste needs to be more regulated. **For instance / For example / To illustrate** many rivers are still polluted by factories everyday and not enough is being done about it. **Furthermore / Besides / Moreover** the sea is also so polluted that the survival of many water species is at risk, risking the complete destruction of our eco system.

To conclude/ In conclusion / Lastly the only way to help improve the situation of the environment is to change our habits for more eco friendly alternatives. **However / Nonetheless / Nevertheless** this is not enough without the motivation and the encouragement of governments. Can we all come together and solve this issue once and for all?
